#### The Ultimate Vehicle Protection System (VPS)

#### The problem

In today's harsh environment your vehicle's exterior paintwork and interior trim endures daily attack from any number of weather borne and human factors.

Due to government legislation manufacturers now have to use water-based paints, which whilst being environmentally safe and friendly are far more prone to fading and oxidisation. Harmful environmental pollutants like road salt, detergent, tree sap, acid rain, traffic film and the sun's powerful UV rays constantly threaten the lustre of your paintwork. This regular surface erosion means that your paintwork needs protection if you want to retain that like-new showroom appearance.

And it's not just your paintwork that's under threat. Dirt and grime carried by you, your family and your pets; plus accidental spillage of food and liquids means that your vehicle's interior is at risk from staining.

#### The solution

# It's not a wax polish; it's a protective barrier!

The problem with modern wax polishes is they simply do not last, every time you wash your vehicle with detergent you wash away a layer of protection.

The GardX Vehicle Protection System with powerful Nanotechnology forms a highly resilient protective coating over your paintwork that shields it from these environmental pollutants and provides a spectacular high gloss showroom finish that retains its appearance wash-after-wash. You may never need to polish your vehicle again!

The GardX System also protects your vehicle's interior. GardX Stain Guard ensures that your seat fabrics and carpets will resist against staining and remain fresh, smart and clean. For leather seats GardX Leather Guard will not only protect against stains, but will also keep the leather soft and supple, like new for years.

The Vehicle Protection System also provides other products that make driving a far safer experience. Please read on to see the exceptional benefits that GardX Glass Guard and Tyre Guard deliver.

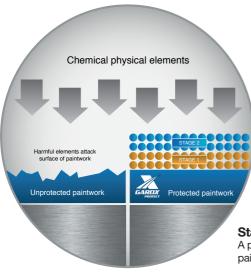

The GardX Vehicle Protection System provides valuable protection for your vehicle, enhances its future re-sale value and comes with the assurance of a LIFETIME GUARANTEE\*.

It can only be purchased from and applied by an authorised Dealer. Ask your Dealer to show you the demonstration video or see it at: http://www.gardx-info.co.uk/gardx/

#### How the exterior protector works

If you look at the paintwork of a new or used vehicle under a microscope you will see lots of imperfections, know as 'castellations'. As your vehicle's paint ages these castellations attract all manner of environmental pollutants that degrade the paint, causing oxidation and fading. The GardX Vehicle Protection System is a hi-tech Nanotechnology sealant that forms a durable and highly resistant invisible coating over the surface of the paintwork, filling in the castellations to create a super-smooth, high gloss, ultra-protective finish.

The GardX Vehicle Protection System is for professional application only and is applied in two stages as follows:

#### Stage 1

A preseal formulation that penetrates into the pores of the paintwork preparing it for sealing with Stage 2.

#### Stage 2

Permanently bonds to Stage 1, creating a high gloss protective coating over the paintwork, like a second skin that resists attack from harmful environmental pollutants.

The GardX Vehicle Protection System has achieved British Standard EN ISO 2812-5:2007

#### How the interior protector works

#### Stain Guard

GardX Stain Guard is a hi-tech formulation that coats each individual fabric fibre with an invisible barrier that protects against liquid spills, dirt, grease, oil and grime. Liquid spillage either passes straight through the weave without staining or simply beads-up and can be removed by wiping off with a clean cloth or vacuuming away.

#### **Leather Guard**

If you have a leather interior, GardX's exclusive Leather Guard treatment will help protect the hide against stains, dirt and liquid spills; and at the same time moisturises the leather to retain that supple like new look.

Liquids are easy to wipe away

Dirt is easily removed

Manufactured under a quality management system accredited to ISO9001

#### **Additional features**

#### Glass Guard - Safety Feature

Creates a far safer driving environment by coating the windscreen with a formulation that repels rain and causes it to bead and aerodynamically run-off. Your area of vision dramatically improves by keeping glass free of rain, snow, frost, salt, dirt, bugs and grit. Glass Guard is suitable for all glass surfaces. Glass Guard is included in your takehome pack for application

#### **Bird Dropping Remover**

As well as being unsightly and unhygienic, bird droppings, due to their corrosive and acidic nature can permanently damage your vehicle's paintwork unless removed quickly. The GardX Paint Protection system will delay the corrosive effect of bird droppings but paintwork damage will occur if the droppings are not removed in a timely manner. GardX Bird Dropping Remover will soften and neutralise droppings, allowing them to be removed quickly and easily. Bird Dropping Remover will also restore protection to the affected area. It is recommended that Bird Dropping Remover is kept in your car, ready for use.

### **Tyre Guard**

#### - Safety Feature

If one of your vehicle tyres puncture, GardX has the solution. Just connect Tyre Guard to the tyre's valve, depress the actuator and Tyre Guard will re-inflate the tyre and repair the puncture. A quick, safe and simple temporary repair.
